

1. Write a Java program to read and display the elements of a 2D array.
2. Write a Java program to find the sum of all elements in a 2D array.
3. Write a Java program to find the largest and smallest elements in a 2D array.
4. Write a Java program to calculate the sum of each row in a matrix.
5. Write a Java program to calculate the sum of each column in a matrix.
6. Write a Java program to find the transpose of a matrix.
7. Write a Java program to add two matrices.
8. Write a Java program to multiply two matrices.
9. Write a Java program to find the sum of the principal and secondary diagonal elements of a square matrix.
10. Write a Java program to check whether a given matrix is a symmetric matrix.
